

### SPECIFY 100% Recyclable Poster Paper and Coreflute for your outdoor displays

#### CITY LIGHT HQ200 POSTER PAPER.

- Highly regarded for its wet strength properties
- Strong fibre bond structure for high tear resistance
- Exceptional photo quality print performance
- Made from renewable and sustainable fibre based material
- PEFC certified
- 100% recyclable and can be placed in any paper or cardboard recycling bin
- Ideal for billboard displays, backlit light box applications (lasting up to 3 months in all climate conditions)

#### RECYCLABLE COREFLUTE

- Available in 3mm & 5mm thicknesses
- 100% Recyclable
- Coreflute signage can be recycled so long as it has no contaminants such as eyelets, laminate, pvc pockets, adhesive tapes, glues, cable ties, wood as in stakes or framing. So consider this when designing.
- Responsible recycling Local Councils will have Coreflute recycling sites listed on their websites.
- Ideal for event signage, real estate & election signage, A Frames, hanging signs.

### Setting up artwork for spot gloss UV

When supplying final artwork, UV artwork should be supplied as an extra page in the pdf set. As below.

It's important to make sure that this layer is identical in all respects to your original CMYK artwork

- Open your artwork in indesign
- Create new layer for Spot UV
- Select elements to be enhanced and duplicate them to a new Layer
- Create a new spot colour swatch and label it UV
- Select UV elements and convert to spot colour
- Make sure opacity is set to 100%
- Copy this layer to a new blank page in your document and check it is in the same position as your base artwork
- Export this UV Layer as a single pdf with trim marks
